 <br> <br> 6.5-7 gallons}1. Start with 1 full drum of Acrylic Resurfacer and 2 clean, empty drums.
2. Split 1 drum of Concentrate material evenly into 3 drums.
3. You will have $181 / 3$ gallons in each drum.
4. Pour 13 gallons of water into each drum and mix well.
5. While continuously mixing material, slowly add 250 lbs sand to each drum and mix until all parts are combined into a creamy consistency.
Note: During hot temperatures use max. range of water dilution, but do not exceed!

18 1/3 Gallons Concentrate
250 lbs. of Sand
13 Gallons of Water
