

# ColorPlus System With Sand

## 55 Gallon Drum Method

**MIXING DEVICE:** 1 or 1.5 hp 3/4" drill with 55 gallon drum paddle mixer

<b>Neutral Concentrate w/Sand</b>	55 gallon drum
ColorPlus Pigment Dispersion	4 gallons
Water	Min. 20 gal./Max. 23 gal.

<b>Neutral Concentrate w/Sand</b>	15 gallon
ColorPlus Pigment Dispersion	1 gallon
Water	6 - 6 1/2 gallons

1. Start with 1 full drum of Neutral Concentrate with Sand and 1 clean, empty drum.
2. Split 1 drum of Neutral Concentrate with Sand evenly into 2 drums.
3. You will have 27 1/2 gallons in each drum.
4. Add 2 gallons of ColorPlus to each drum.
5. Rinse out the empty ColorPlus Pigment pails into clean, empty 5-gallon buckets. This step helps to clean the remaining pigment out of the ColorPlus pails while accounting for your dilution water.
5. Add 10 gallons of water to each drum and mix until all part are combined into a creamy consistency.

**Note:** During hot temperatures use max. range of water dilution, but do not exceed!
