DISTRIBUTION LOCATIONS
SportMaster products are distributed through a world-
wide network of stores and distributors.

Call (800)395-7325 or visit www.sportmaster.net to
find a location near you.

PRODUCT DESCRIPTION & BENEFITS
TRACKMASTER PLUS is a colorized, elastomeric acrylic
emulsion manufactured with graded rubber particles.
The TrackMaster Plus coating system is designed to
impart exceptional flexibility and durability to running
tracks, and other sport surfaces.

RECOMMENDED USES
TrackMaster Plus is designed for beautifying and pro-
tecting asphalt, concrete, or rubberized running tracks
and field event surfaces. TrackMaster Plus protects
against oxidation and moisture penetration of asphalt
surfaces. TrackMaster Plus also reduces maintenance
costs and prolongs the life expectancy of rubberized
tracks & line striping.

COLOR
Many attractive colors available using the SportMaster
ColorPlus™ system.

SURFACE PREPARATIONS
Pavement surface must be cleaned entirely of dust, dirt,
debris and all loose materials and vegetation. New as-
phalt must cure 14 to 30 Days, and new concrete must
cure 28 days, before application. Old, oxidized asphalt
surfaces may require a coat of Acrylic Adhesion Promo-
tor (see Technical Bulletin CMT-21). Depressions and
shallow, damaged areas in the rubberized track surface
can be corrected by patching with Lane One (or Acrylic
Patch Binder mix, if in the asphalt/concrete). If existing
surface is very porous or smooth, coat(s) of Acrylic Re-
surfacer can be applied to fill voids or texture a smooth
surface for consistent application of coating and rubber
particles.

MIXING PROCEDURES
Dilute TrackMaster Plus with water using the
following ratio:

<table>

</tr>
</tbody>
</table>

APPLICATION
As a coating, TrackMaster Plus is applied using a soft
rubber squeegee. TrackMaster Plus can also be sprayed
with air diaphragm or hydraulic spray systems. A mini-
mum of two coats are recommended. Allow the coated
surface to cure for 24 hours before opening up for use.

PROTECTION
Protect finished TrackMaster Plus surface from equip-
ment, vehicles, and other potentially damaging traffic.
Use soft-soled, running-type shoes. Cleats and running
spikes will shorten the life of the coating.

IMPORTANT
Stir before using. Surface and air temperatures must be
above 50 degrees F (10C) during application and for at
least 24 hours after application. Do not apply if rain is
imminent or forecast. Keep from freezing. Close con-
tainer when not in use.

DRYING TIME
Forty-five to ninety (45 to 90) minutes under optimum
conditions.
COVERAGE
First coat coverage will normally range from 0.15 to 0.25 gallons per square yard depending on the age, roughness, and porosity of the surface. Coverage on successive coats will range from 0.10 to 0.20 gallon per square yard. Yield is based on undiluted TrackMaster Plus.

CAUTIONS
Do not store in direct sunlight or where temperatures exceed 100°F. Do not apply if rain is imminent or forecast. Keep from freezing. Close container when not in use.

WARRANTY
The statements made on this technical bulletin are believed to be true and accurate, and are intended to provide a guide for approved construction practices. Manufacturer does not make, nor does it authorize any agent or representative to make any warranty, express or implied, concerning this material as workmanship, weather, construction, equipment utilized and other variables affecting results are all beyond our control. Manufacturer warrants only that the material conforms to product specifications and any liability to the buyer or user of this product is limited to the replacement value of the product only. In no event shall Manufacturer be liable for any injury, loss or damage, either direct or incidental, special or consequential, however arising, in connection with material or equipment furnished or work performed. Manufacturer shall not, in any manner, be liable for any defects, variations or change in condition in the substructure over which its products are installed.
